JAIN HEADLINE NEW

JAIN Community debuts on java.net

Sun released at JavaOne a new website for Java developers and enthusiasts to collaborate on projects, share ideas, and create the next “big thing”. Under Java Communities, surf through Java Communications and you will find an abundance of JAIN related activities mixed in with other technologies.

Under Java.net, you will find the JAIN SIP project where downloads of JAIN SIP RI, TCK, and other great SIP tools reside. Also you will find the 'SIP Communicator' – a soft phone with IM support written on JAIN SIP. The SIP Presence and Proxy projects contain IM user agents and proxy applications on JAIN SIP. JAIN SIP Rocks big time!

JAIN at JavaOne

The JAIN presence at JavaOne was evident with a pod and several Sessions. Attendance for JavaOne was very good with high interest in JAIN at the pod. The JAIN sessions, which were well attended, included JAIN SLEE, JAIN SIP, SIP for J2ME, and Mobility, Presence and Instant Messaging.

JAIN SIP API adoption on the rise
